

Shapes Stop Motion Storyboard

My viewers sing play throughout animation

appears after shape moves into frame

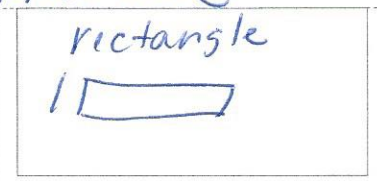

The word shapes "enter" frame one letter at a time and then "leave" frame as letters leave, play some sort of music that goes along w/ small movements/tinkling sound?

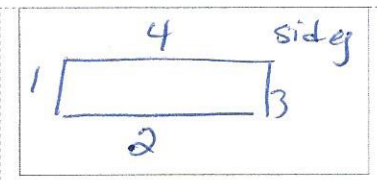

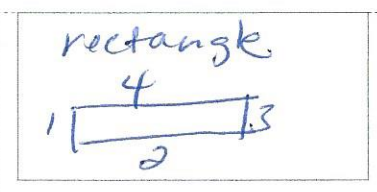

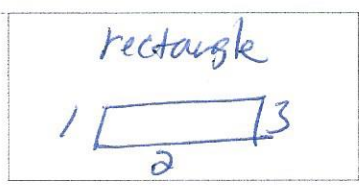

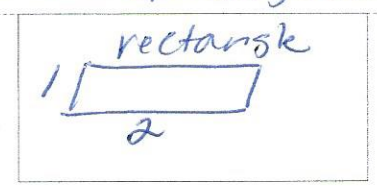

Each shape enters from the bottom, Order of Shapes:

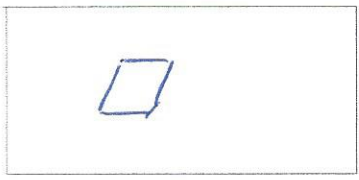

- 1) Rectangle
- 2) Square
- 3) Triangle
- 4) Circle

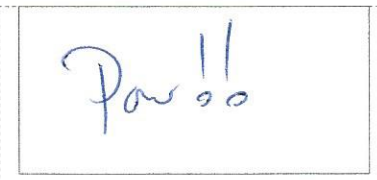

Each number will appear one at a time

shape name leaves - "sides" appears - & when side appears short sound plays to draw attention to the word sides.

After rectangle sequence, the rest of the shapes will appear and follow the same procedure/process as all audio stays the same

Fun smart art added = breaks up sequence bridge to last slide.

Shapes Stop Motion Storyboard

"How many sides
do you have"

Break up the
phrase and have
it come in from
the bottom

End Credits
